## PROFESSIONAL SUMMARY

---

**Senior Full Stack Engineer with 5.6+ years building and operating distributed, high-throughput systems in production.**

Core expertise in Java (8/11/17), Spring Boot, Micro services, Apache Kafka, Redis, React.js, and AWS — with a track record of reducing P99 latency by 30%+, sustaining 99.9% availability under peak load, and shipping production features across Agile sprint cycles.

*AWS Certified Solutions Architect (Associate) | Oracle Certified Professional Java SE 11 | Strong Low-Level Design and system design foundation.*

## TECHNICAL SKILLS

---

**Languages:** Java 8 / 11 / 17, JavaScript (ES6+), Typescript, SQL

**Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Micro services, Apache Kafka, Redis, OAuth 2.0, JWT

**Frontend:** React.js, Typescript, HTML5, CSS3

**Databases:** PostgreSQL, MySQL, Oracle, MongoDB — query optimization, indexing, schema design

**Cloud & DevOps:** AWS (EC2, S3, RDS, SQS, Lambda), Docker, Jenkins, Git, Maven, CI/CD pipelines

**Observability:** ELK Stack, structured logging, health monitoring, alerting

**System Design:** Distributed systems, event-driven architecture, caching strategies, rate limiting, circuit breakers, load balancing, eventual consistency, Low-Level Design

**Testing:** JUnit, Mockito, integration testing, TDD, SOLID principles, code reviews

## PROFESSIONAL EXPERIENCE

---

**Software Engineer | Test Yantra Software Solutions | Bengaluru, India** *Apr 2023 – Present*

**Stack:** Java 17, Spring Boot, Micro services, Kafka, Redis, React.js, Typescript, Oracle, MySQL, Docker, Jenkins, AWS

- Architected and owned 6 backend micro services for a high-traffic B2C flight booking platform processing 50K+ daily transactions; reduced end-to-end P99 latency by 30% (400ms to 280ms) via Redis caching and optimized Kafka consumer group configurations.
  - Designed event-driven order processing pipeline with Apache Kafka, decoupling booking, payment, and notification services — improving system throughput by 35% and enabling independent horizontal scaling of each service.
  - Engineered fault-tolerant REST API integrations with 4 third-party travel vendors (GDS systems, payment gateways), implementing circuit breakers and retry logic; maintained 99.9% upstream availability under 3x peak load.
  - Led end-to-end delivery of the flight management module (Spring Boot, React.js, Typescript), reducing customer support tickets by 25% through improved backend validation and UX.
  - Optimized 15+ complex SQL queries and redesigned indexing strategies across Oracle and MySQL — 40% reduction in retrieval time for reporting dashboards querying 10M+ records.
  - Built and owned CI/CD pipelines (Jenkins, Docker, Maven, Git), reducing deployment effort by 50% and accelerating release cadence from bi-weekly to weekly across 4 squads.
  - Participated in on-call rotations; resolved P1 production incidents within SLA using ELK Stack and structured logging — reduced MTTR by 20%.
  - Mentored 2 junior engineers; conducted peer code reviews, enforcing SOLID principles and 80%+ test coverage standards.
- Project Excellence Award — 30% latency reduction and 99.9% uptime during 3x peak load on the booking platform.*

**Associate Software Engineer | Test Yantra Software Solutions | Bengaluru, India** *Oct 2019 – Mar 2023*

**Stack:** Java 8/11, Spring MVC, Spring Data JPA, Hibernate, MySQL, Oracle, JavaScript, HTML5, CSS3, REST APIs, Jenkins

- Developed and enhanced 8+ backend modules for an enterprise B2B travel platform using Java, Spring MVC, Spring Data JPA, and Hibernate — streamlining workflows across high-volume transactional data.
- Designed relational database schemas and built composite indexes across MySQL and Oracle; improved batch job throughput by 35% for operations processing 500K+ records per run.
- Refactored 3 core frontend workflows (JavaScript, HTML5, CSS3), reducing user task completion time by 15% through fewer interaction steps and cleaner client-side state management.

- Integrated 5+ third-party APIs (payment, logistics, GST); resolved critical production defects, reducing production defect rate by 25% over 2 consecutive quarters.
  - Delivered stable production releases each sprint across a 10-member cross-functional Agile/Scrum team.
- Employee of the Month — Drove 25% reduction in customer support volume through flight module reliability improvements.*

## PROJECTS

---

### **E-Commerce Platform** — *Full Stack Engineer*

**Stack:** *Java 17, Spring Boot, React.js, MySQL, Apache Kafka, AWS (EC2, S3, RDS), Docker, Redis, JUnit, Mockito*

- Designed event-driven micro services architecture (catalog, cart, orders, payments, notifications) with Kafka — horizontally scalable to handle concurrency spikes.
- Implemented Redis-backed distributed locking for inventory management, eliminating race conditions and reducing order failure rate by 18%.
- Built secure payment processing with tokenization, PCI-compliant payloads, and idempotent handlers to prevent duplicate charges.
- Achieved 85%+ code coverage with JUnit and Mockito; deployed on AWS with Docker with shipping and tax API integrations.

### **Real-Time Chat Application** — *Backend Engineer*

**Stack:** *Java 11, Spring Boot, Web Sockets, Redis Pub/Sub, PostgreSQL, JWT, Docker*

- Built a Web Socket-based messaging system supporting 1,000+ concurrent connections with Redis Pub/Sub fanout across horizontally scaled nodes.
- Implemented JWT authentication with role-based access control (RBAC), securing private channels and direct message threads.
- Designed PostgreSQL schema with covering indexes — sub-50ms read latency on recent message queries verified via query plan analysis.

## CERTIFICATIONS

---

**AWS Certified Solutions Architect – Associate** — Amazon Web Services

Jul 2022

**Oracle Certified Professional, Java SE 11 Developer** — Oracle

Sep 2021

## EDUCATION

---

**Bachelor of Engineering, Computer Science**

May 2019 – Apr 2022

Sardar Patel University • GPA: 7.4 / 10

*Relevant Coursework: Data Structures and Algorithms, Software Engineering, Database Management Systems, Operating Systems, Web Development*
